following
the natural
spirit

We are instinctively inclined to select designs, which appear naturally. It is a privilege to use such designs, as they represent achieving purity in a world, which is fast becoming more mechanical. The “Back-to-Nature” trend, predominantly used in natural looking and practical furniture, as well as decorative objects made from natural materials, is reflected in fabrics as organic patterns and cool colors. A solid proof that we are somehow connected with our inner existence, this trend molds into a strong expression, the fresh and comforting effect of nature, when the design world of Yataş blends its color and pattern spectrum with nature.

PAPAYA

A Warm Touch of Happiness

The new season's colors take us to another dimension in the universe of colors. We not only "see" the colors in this new dimension, but also "experience" them by living and feeling them. The bold and extraordinary choices we make directly affect our emotions. They also replace the old rigid and strict rules of the decorating business.

Papaya offers a balanced contrast to the cooler range on the color spectrum. It provides a harmony with warm earth hues. This new season, it will be a popular color in the decoration business, as it offers multifaceted energetic hue compositions.

The real goal in today's world of decoration is to create feelings of freedom and wellness. Yataş is raising the energy level with Papaya in an effort to set a higher benchmark for people who want to get rid of the dreariness in living spaces. Papaya's fresh and vigorous energy, which creates a feeling of sheer lightness, reminiscent of summer days, redefines sleep experience, along the axis of vigor, warmth and happiness.

In addition to a pillow to support the head and neck, and a duvet to keep the body temperature at the perfect level, a good mattress to support the spine is also required for good sleep, which is a must for a beautiful and healthy complexion. TEXTILE ACCESSORIES

Small accessories are the backroom heroes of decoration. In the new season, they are gradually stripped from their merely secondary roles, and take control of the decoration hubs with widespread use of multiple colors and materials. These accessories are the most elegant way of showing how small differences in the world of colors and textures, create a big difference in the final output. The product range extends from ergonomic decorative pillows to colorful throws and warm blankets.

The decorative pillows we put on our couches and beds, are no longer considered a complementary item, but are viewed as an essential setting of the decor. In the new season, the throws will enhance the elegance of the decor with their colors and textures. The blankets we put on our knees while watching a movie or catching up with friends, or when we cuddle under while taking casual small naps, are much thinner and stylish and yet warmer and softer today, thanks to the significantly improved fabric quality.

“COOL” LOOKS IN BEDROOMS

Independent, unique and stylish... The three main features of coolness given above, are not only behavioral traits, but also the drivers of life, manifesting itself from clothing to decors.

Creativity is the most important feature of “being cool,” which is essentially defined as the reluctance to give up on what is personal, unique and private, irrespective of mainstream trends.

This attitude heavily centers around neutral colors, easily harmonized with different textures, colors and objects in a creative way, along with the axis of gray in decoration. Highly keen on personal details, Yataş’s sophisticated designs introduce this “cool” approach to bedrooms.

SELECT REFLECTIONS OF TRADITIONAL TEXTILES

The Jacquard weaving technique is a modern version of the traditional handwoven Turkish textile. These materials give life to the most select designs of Yataş's top quality design lines. The duvet cover sets are produced by embodying the fabric woven patterns as from the loom using dyed fiber. The traditional ones display a select choice of "cool" styles, customized for a set of specific clients.

EASIER LIFE WITH FITTED SHEET

There is a strong correlation between the quality of a good night's sleep, a must for a fresh start to a new day, and the comfort of the body and the uninterrupted nature of sleep. This is why all of our sleep instruments, ranging from mattresses and duvet covers, to bed sheets, should be designed to give us the comfort and uninterrupted sleep we need. Fitted sheets come into play at this critical moment of decision making.

Even the slightest displacement of the bed sheet, which is a protective layer of fabric between our body and the mattress, may at times destroy our entire sleep routine. This is why the fitted sheet, which firmly fixes itself onto the mattress, denying any unwanted crumpling, is one of the most important inventions in the bedroom textile industry's history.

Yataş's multi-wash four-season 100% cotton fitted sheets are available in different color choices, to make the right match with your duvet cover sets. Now you can set your sleep free of any discomfort or worries.
